Executive Profile

Safely Delivering the U.S. Department of Energy's Vision for the East Tennessee Technology Park Mission

Business Manager

Tony Fountain

Tony Fountain is a retired CFO and Project Business Manager. Most recently he served as CFO and Business Manager for URS|CH2M Oak Ridge LLC, the Dept. of Energy Prime Contractor for the K-25 Decontamination-Demolition Project.

Tony has 38 years of leadership experience in finance, accounting, procurement, human resources, pension, benefit administration, business systems, project support, and EVMS certification for major nuclear projects. He has worked on Department of Energy, Department of Defense, and commercial projects serving in transitions, startups, and closures.

Before becoming UCOR Business Manager, Tony managed all business services for the \$2.5 billion Yucca Mountain Project. As part of the Yucca Mountain team, Tony provided human resources, procurement, contracts, finance, information technology, and property management services to 1,100 workers and subcontractors. He acted for the project manager as required, as well as conducted all employee meetings to sustain morale, safety, and high performance levels. He submitted all standard reporting on time or ahead of schedule amidst severe accounting staff reductions.

Tony also served as Senior Vice President and Chief Financial Officer of the URS Power Business Unit in Princeton, NJ. He led finance, accounting, project business management, reporting and internal controls for a \$1 billion commercial operation. Tony managed an annual budget of \$7 million and 80 personnel, as well as provided business support to 50 concurrent power projects and 20 concurrent engineering and construction projects.

He also served as Vice President and Chief Financial Officer for West Valley Nuclear Services Company at the West Valley Demonstration Project in West Valley, NY, where he managed 98 personnel with an annual budget of \$10 million. In addition to his usual responsibilities, he established a new accounting and reporting system that allowed senior management to track cost and schedule performance against performance based incentives. He also helped to reduce the cost of business operations services by \$4 million while maintaining quality and safety standards.

He also served as Business Manager and Controller for the Westinghouse Anniston Division at the Anniston Chemical Agent Disposal Facility, where he directed the transition, startup and implementation of finance and accounting system for the \$726 million U.S. Army contract for construction and operation of a chemical weapons demilitarization plant with 600 site personnel. He led a 28-person staff with a \$7 million annual budget.

Tony is a graduate of the University of Pittsburgh and earned a graduate degree at Loyola College.
